Java developer with 8+ months building Spring Boot REST APIs and secured microservices across two internships. Skilled in JWT/RBAC, JUnit, MySQL, and actively building CI/CD pipelines with GitHub Actions and Terraform

EXPERIENCE

Full Stack Developer Intern: Skeletos IT Services LLP, Pune

Nov 2025 – Feb 2026

- Built Java/Spring Boot backend services with standardized REST API error handling and consistent response schemas, enforced as the team standard across client-facing modules
- Secured microservice endpoints with JWT + RBAC — role-specific access policies blocked unauthorised calls to sensitive operations, following clean architecture principles
- Introduced Git feature-branch workflow in an Agile/Scrum environment, enabling 3+ concurrent features to ship across sprint cycles without destabilising the main branch

Junior Software Engineer Intern: Cravita Technologies Pvt. Ltd., Pune

Feb 2025 – Aug 2025

- Developed banking application modules for account management and transaction processing in Java + Spring Boot, integrated with a client-facing frontend as part of a cross-functional Agile team
- Eliminated N+1 queries and added response caching in a Spring Boot + React application — cut average API latency from ~800 ms to ~300 ms, added structured logging for post-deploy observability
- Resolved 15+ bugs using JUnit-based unit tests and root-cause analysis across two Agile sprint cycles, pushing module code coverage above 80%

SKILLS

- Languages:** Java, SQL
- Frameworks:** Spring Boot Microservices, REST API
- Web Technologies:** React.js, HTML, CSS, JavaScript
- Databases:** MySQL, PostgreSQL
- Security:** JWT, RBAC
- Version Control:** Git, GitHub
- DevOps & Tools:** Terraform, GitHub Actions (CI/CD), Microsoft Azure
- Testing & QA:** JUnit, Mockito, Manual Testing (SDLC, STLC, Test case writing)
- Tools:** Eclipse, VS Code, Postman, JIRA

PROJECTS

Real-Time Event Management System

Nov 2025 – Jan 2026

- Built a Spring Boot + MySQL backend to handle concurrent event registrations and ticket bookings without double-booking conflicts — implemented MySQL transaction-based prevention, EXPLAIN-based query optimization on high-traffic endpoints, and provisioned cloud infrastructure with Terraform on Microsoft Azure

Smart Email Assistant | [GitHub](#)

Aug 2025 – Sep 2025

- Built a Spring Boot application integrating Gemini AI API to automate context-aware email reply generation, reducing manual effort for repetitive communication — secured via outbound REST calls with timeout handling, structured error responses

AI-Based Resume Screening System | [GitHub](#)

Jan 2025 – Apr 2025

- Built a multi-role backend (HR + Candidate) to automate candidate shortlisting and reduce manual HR effort in resume-to-job matching — secured with JWT + RBAC for role-specific access, REST APIs for resume upload and AI-driven matching delivering sub-2s responses for 50+ daily requests, with CI/CD pipeline via GitHub Actions

EDUCATION

MCA — Sinhgad Institute of Management & Computer Application, Pune

Jul 2023 – Jun 2025

CGPA: 7.51

B.Sc. Computer Science — Shri Shivaji Science College, Nagpur

Jul 2019 – Jun 2022

CGPA: 7.78

CERTIFICATIONS

- Java Full Stack Development | Naresh IT, Hyderabad Apr 2023
- DevOps | DevOps Insider Ongoing

Extra-Curricular Activities

- Blind Coding Coordinator at Tech-Drill, managing 200+ students during the tech event
- Volunteer at Logica, assisting with event coordination and participant management tasks
